

VetPop for Shelters

Free health records for rescued animals, and for the people who adopt them.

VetPop is a veterinary health-record platform built by **Healcore Softwares FZCO**, a Dubai-registered company. Access is **free of charge for animal shelters and rescue organisations**: no contract, no card, no limit on the number of animals. VetPop does not run adoptions. It records the health of every animal in the shelter, and makes sure that record follows the animal into its new home.

WHAT THE SHELTER GETS

1	One record per animal	Intake examination, identification, vaccinations, deworming, treatments, weight history, medical documents and certificates, from the day the animal arrives.
2	Remote follow-up	For animals recovering from surgery, staff fill in a short daily reading. The treating veterinarian sees it in real time and reacts before a case deteriorates.
3	Direct line to the vet	Secure messaging with the veterinarian, attached to the animal rather than to a phone number.
4	Handover to the adopter	The complete record is transferred to the new owner and takes effect only once they accept it. Nothing is printed, nothing is lost.
5	Any clinic, anywhere	When the adopter books an appointment with any veterinarian, that veterinarian gets free access to the full history. Continuity of care costs nothing to anyone.

WHAT IT COSTS

Shelter	Free. Unlimited animals. No contract, no card.
Veterinarian	Free for life, for every verified veterinarian. Unlimited patients.
Adopter	Free account, unlimited animals, appointment booking and prescribed follow-up. An optional subscription unlocks the detailed health record for personal use.

TRUST AND CONTROL

Verified veterinarians	Identity verification through our KYC partner, then an automated diploma check and a human review in case of doubt. Only verified practitioners get access.
The record belongs to the owner	Data is never sold and never used for advertising. Access granted to a veterinarian can be withdrawn at any time. Export and deletion on request.
Seven languages	English, Arabic, French, Spanish, German, Italian and Portuguese.
Nothing to install	VetPop PRO runs in any browser, on computer, tablet or phone. The owner app is available on iOS and Android.

Open your shelter account

Free for the shelter, free for your veterinarians, unlimited animals, for life.
Shelter accounts are opened by our team, not by self sign-up. Write to us and we set yours up.
